

## AVerCapture M

### Preserve the Sensations for Your Mac!

#### Record from Your Camera, VCR or DVD

AVerCapture M resolves your trouble with piles of old VHS tapes. You can turn your beloved old movies into digital formats and easily refine the quality of videos like a professional. Through the USB interface, you can connect your Mac with set-top box and home video devices, such as DV, V8, VHS, and DVD player to capture and edit all your favorite shows easily.

#### Optimize Your Recordings

The AVerStudio equips the exclusive Color Enhancement technology which can automatically adjust video quality and optimize your recordings with clear, sharp and vivid video color. Beside, the Color Adjustment feature can fine tune the brightness, contrast, hue and saturation to suit your preferences.

#### Playback on Various Apple Devices

Still can't find the right solution to capture video on your Mac? AVerCapture M is a perfect solution for Mac users in personal video creating; it allows you to create high quality home video and export your precious recordings to Apple devices as you wish. The accompanying AVerStudio software can convert your recordings to iPod, iPhone, iPad, and even Apple TV formats.

#### Share Your Recordings Online

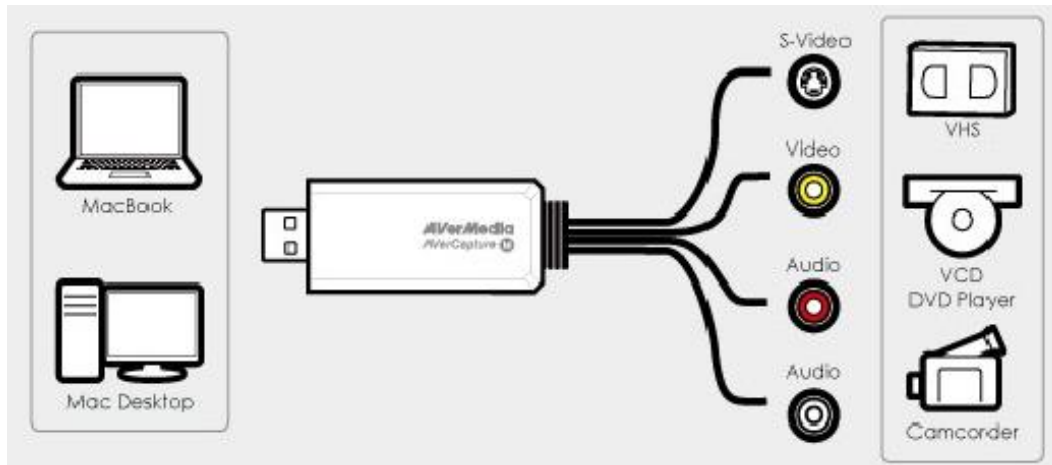

You can export recordings to Toast and burn recording into DVD, or share video clips on YouTube & Facebook. All these can be done with few clicks under AVerStudio.
