

Gaming Speakers 50W

Premium Sound Configuration for Gaming

In the midst of your gaming world lies an incredible auditory journey. Duality speakers are the guide through this adventure. Game audio is distinct from home theater or any other audio types, and your speaker system must be attuned to this world. No warrior steps onto the field of combat without a weapon of resonance. Duality prolongs optimal sounds long after your game is finished. Configured specifically for gaming environments, you'll encounter crystal clear high frequencies and rich throaty bass sounds with lessened distortion. This is the sound of gaming come to life.

Independent Bass and Treble Adjustment

Every great game is designed with its own unique audio environment. What you need is the flexibility to bring big balanced sound for each and every one of your gaming journeys. Duality speakers allow you to adjust and separate treble and bass to fit your preferred acoustic sound. Enhance the experience further by plugging in your headphones for a deeper tactical advantage or the high resolution gaming microphone for clear and crisp voice chat. Duality is your personalized audio environment.

Multiple Inputs and Headphone Output Jack

Precise control is the key to every victory. Duality delivers with a centralized control console wherever you need it. The multifunctional console gives you power, volume, bass, and treble adjustments at a finger's reach. Your A/V gear isn't left out, the console includes RCA and 3.5 mm auxiliary jacks so you can shape your audio environment. Wherever your game takes you, you are in control.

Two-Way Satellite Speakers

You don't play a game with your eyes closed, so why would you use speakers that lack an audio punch. Armed with a discrete crossover network, Duality delivers incredible low frequencies and crisp, exhilarating midrange tones. With a generous 6.5" subwoofer, 2.75" drivers and a custom designed 1" tweeter, the 2.1 speakers are engineered to reproduce every single breath, desperate gulp, or tooth-grinding chill. When the score is powerful, your gaming isn't complete without Duality on your side.
