

## AVerTV Volar™ Hybrid Q

AVerTV Volar™ Hybrid Q is presented with its elegant exterior and powerful performance that allows you to enjoy watching digital/ analog TV and listening to FM radio on your PC. The exclusive extendable High Gain Antenna promises a robust digital TV and FM radio reception. Even better, by simply connecting analog video devices through Composite or S-Video inputs, you can preserve your favorite videos in various digital formats.

With the latest AVer MediaCenter3D software, you can easily pause, fast forward and rewind Live TV by applying TimeShift function when you need to leave the on-going show for a moment. Besides, you can also schedule a recording for your favorite program effortlessly via EPG without puzzling around finding the air time. Moreover, the real-time iPhone/ iPad format recording function allows you to enjoy recordings on your iPhone or iPad on the way without the tedious video conversion job.

The accompanying SnugTV Station software lets you to enjoy your home TV real-time over the Internet when you are traveling around the world. Apart from those great software functions, AVerTV Volar™ Hybrid Q is fully compatible with Windows Media Center that allows you to watch TV with what you are accustomed to.

# Introduction of AVer MediaCenter 3D

## Intuitive User Interface

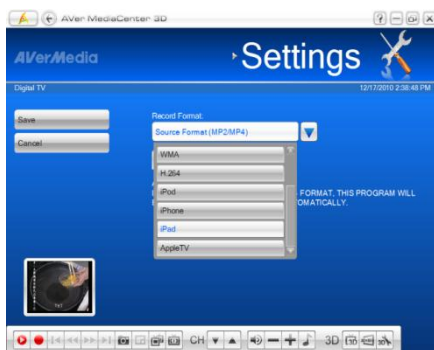

AVerTV 3D provides you an intuitive user interface with frequent-used function buttons listed right on the toolbar. You can easily switch channel, adjust volume, or watch the astonishing and immersive live 3DTV with one click, just like the same way you do with TV.

## Real-time iPhone / iPad Format

### Recording

AVer MediaCenter 3D can help you record your favorite shows in iPod, iPhone, or even iPad format without wasting time doing a file conversion. Load recordings and have fun during a long trip!

### Color Adjustment

Your desire for premium video quality should not be compromised. AVer MediaCenter 3D supplies you with a Color Adjustment tool, which can fine tune the brightness, contrast, hue, saturation, and sharpness of the TV image.

### Multiple-card Support

When there is more than one AVerMedia TV tuner card or capture card in your system, AVer MediaCenter 3D can present the images from different devices in the same window at the same time.
